

Mobile Phone Compatibility Chart

Use the Solar PowerBank **M5** to charge nearly any mobile phones and smartphones. Only requirement for charging is a USB compatible interface (5V, max. 500mA). With a suitable charging cable you can connect your device to the Solar PowerBank **M5**. The accessories include a set of adapters. If there is no proper adapter available ask your local dealer or an electronic specialist shop for a suitable USB charging cable.

The following compatibility chart shows a range of usual manufacturers and their current models.

Apple

iPhone, iPhone 3G

Blackberry
